Important dates:

Last Date of Registration:

20th Jan'21

Announcement of selected candidates:

25th Jan'21

Schedule of the event: 1st Feb - 5th Feb'21

Eligibility:

- ❖ Academicians: Faculty in any discipline from the engineering institutions.
- ❖ Industry personnel
- ❖ Research Scholars

Registration:

No registration fee is charged for the programme, since the program is fully sponsored by AICTE, New Delhi.

Registration will be based on First Come First Serve basis.

Interested candidates are requested to complete online registration as early as possible; selection of candidates will be intimated by e-mail only. Digital certificate will be issued by the ATAL academy to the participants, who maintain an attendance of minimum 80% and score more than 60% in the assessment test that will be conducted on the last day of

About the Institute

G. Narayanamma Institute of Technology & Science, a leading engineering college in Hyderabad for women founded by Late Sri G. Pulla Reddy garu in 1997, with the objective of providing an excellent learning facility for women to pursue education in engineering. The institute aims to promote Technical Education among Women to enhance and build-up a new generation of thinkers, innovators and planners in the technical realms of Science & Technology. GNITS received UGC autonomous status for 10 years from 2018 and is affiliated to Jawaharlal Nehru Technological University (JNTU-H), Hyderabad. It is approved by All India Council for Technical Education (AICTE), accredited by NAAC & NBA (AICTE) and ISO 9001:2015 Certified Institution.

About Dept. of ECE

ECE Department was started in 1997 with an intake of 60 and in a short period, the intake was increased to 180. The Department introduced M. Tech. with specialization in Digital Electronics & Communication Engineering in 2007 with intake of 18 students. There are 8 Doctorates in the Department. Amount of 2 crores is spent for establishment of labs. For the academic year 2018-19, the department got 25 lakhs of funding through AICTE. The infrastructural facilities have been upgraded in the department with the extension of existing

and new laboratories in VLSI, Communications, Microwave and Signal processing domains.

The companies that have made good offers and absorbed our students are Deloitte, Infosys, Accenture, Powerwave, CAP Gemini, ADP, Apps Associates, Areva T & D, Broadcom, BTBP, CMC, Convergys, DuPont, HP, HSBC, MAQ Software, OSI Technologies, Redpine Signals, Satyam BPO, Sonata, TCS, Value Labs and Virtusa.

About ATAL-FDP

AICTE Training And Learning (ATAL) Academy Faculty Development Programme (FDP) intends to conduct faculty trainings through financial assistance from AICTE to enable faculty members in the field of technical education to introspect and learn techniques that can help prepare students for active and successful participants in a knowledge society.

Objectives of this FDP:

- ❖ To provide an extended knowledge on Wearable devices using Internet of Things.
- ❖ To provide insight of various communication networks for wearable devices
- ❖ To explore recent research work in the field of Wearable Devices in association with IOT
- ❖ Applications of Wearable Devices with IOT

Contents

- Introduction to IoT and Wearable Devices
- Architecture of Wearable IoTs
- Low Power Embedded Systems in wearable Devices
- Communication Technologies for Wearable Devices
- Performance Analysis of Wireless Sensor Networks
- LoRaWAN Devices
- Flexible and Stretchable electronics
- Wearable body Area Sensors
- Wearable Medical Devices
- Management of wearable systems

Resource Persons

- ✓ Professors from IIIT's
- ✓ Professors from IIT's
- ✓ Professors from NIT's
- ✓ Leading industry technocrats from industry handling the wearable devices and IO

REPORT

FDP on “Wearable Devices”

Date of program: Feb 01-05, 2021

Resource person:

About the Program: Wearable devices or gadgets are electronic devices worn by consumers ubiquitously and continually to capture or track biometric information related to health or fitness. Wearable devices are new manifestations of accessories that people wear, such as Apple's Watch or Samsung's Gear Watch or more dedicated tools like the Fitbit. The FDP also covered introduction to various IOT and Wearable devices, overview of wearable technology, medical imaging using IOT etc. These wearable devices are used for tracking information on real time basis.

The overall experience of attending the workshop is quite helpful in a better understanding on wearable devices as part of wellness programs to encourage employees to stay active and promote overall well-being. Wearables equipped with GPS can help users track their location, which can be beneficial for outdoor activities, navigation, and safety. Over all very useful in designing real time projects by the students.
